

# Investing in the future of Australian canola

**Cargill** | *Nourishing the world*

Cargill SustainConnect®

Cargill speciality canola

Upgraded crush plants

Canola and cotton seed livestock meal

**At Cargill, we love canola and oilseeds. For over six decades we have been investing in the future of the Australian oilseeds industry, helping to build one of Australia's most important agricultural products and exports.**

**We believe the future is bright... yellow and Cargill is as committed as ever.**

- Leading oilseed crusher in Australia after our \$100million upgrade to Newcastle, Footscray and Narrabri crush plants.
- Leading manufacturer of refined oils and supplier of oils to food manufacturers and into food service market.
- Major exporter of Australian canola providing Australian growers access to Cargill's international market network.
- Pioneering Victory hi-oleic canola program with leading varieties and program benefits for growers.
- Australia's first sustainable canola program, Sustain Connect, rewarding growers for more sustainable canola production.
- Key supplier of canola and cotton seed meal into the domestic and international animal feed market.
- Major buyer of canola and other oilseeds from Australian farmers across Australia.
- Leveraging Cargill's global experience in biofuels to support the biofuels sector in Australia.
- Storing and handling canola through our GrainFlow network.
- Largest crusher of cotton seed in Australia.
